

## **Erin Prairie Planning Vision**

Develop a plan for land use and supporting ordinances that provides landowner equity with surrounding towns, while attempting to preserve agricultural lands and natural areas.

The plan must address the current situation of the town and consider the impact of local and surrounding growth including the extraterritorial plat review boundary of the City of New Richmond.

The plan shall include considerations for equal development opportunity in the town but also address the influences that land types, transportation systems, and surrounding areas have on the logical locations for development and preservation.
