

Water Resources Engineer

Cedar Corporation is seeking to fill a leadership position within our Green Bay Municipal Water Resources Engineering Group.

We are looking to add a leader with 10+ years experience to our Water Resources Team to assist our clients in addressing a wide variety of challenges facing their communities from master planning and technical feasibility studies through design and construction on Water, Wastewater and Stormwater projects.

If you bring client relationship skills, project management, and advanced technical expertise developing projects in the Water Resource arena, this will be a significant career building opportunity for you! You must possess strong leadership, organizational, critical thinking, communication, presentation and problem-solving skills. A sincere desire to coach, mentor and build current and future staff within a collaborative work environment key to your selection.

Responsibilities Include:

- Project Development – work with clients to understand their needs and develop solutions to their municipal water system challenges
- Project Design/Coordination – lead design team and administer projects involving wells, storage, and distribution systems
- Project management – assign tasks and schedules to project team members and monitor project progress
- Consulting – serve as a technical expert for water system master plans, water studies, rate analysis, and capital improvement planning

Required Experience:

- Bachelor's or Master's degree in Civil, Environmental, or related engineering discipline
- Professional Engineering License (PE) in Wisconsin or ability to obtain within one year
- Consulting experience in water system master plans, water studies, rate analysis and capital improvement planning projects
- Project development experience where the primary focus was working with clients to understand their needs and develop effective solutions
- Leading project designs and teams
- Project management which included scheduling, budgeting, assigning tasks and tracking project progress

Preferred Qualifications:

- Technical experience on a variety of municipal water resource projects
- Engineering consulting experience

The position provides a competitive salary and full benefit package.
